

Nail Sizing: Coin Method ✨

1. Start with clean, bare, natural nails (no polish or press-ons).
2. Place your hand flat on a well-lit surface.
3. Use a U.S. quarter coin.
4. Position the coin heads-up with the face pointing left.
5. Align the coin next to your thumb nail to show width clearly.
6. Keep fingers straight and pressed closely together.
7. Take a clear photo directly above your hand.
8. Repeat the process for your other hand.
9. Send both photos to Pretty Pures for accurate sizing.
