

Nail Sizing: Coin Method ✨

1. Start with clean, bare, natural nails (no polish or press-ons).
2. Place your hand flat on a well-lit surface. • Use a U.S. quarter coin.
3. Position the coin heads-up with the face pointing left.
4. Align the coin next to your thumb nail to show width clearly.
5. Keep fingers straight and pressed closely together.
6. Take a clear photo directly above your hand. • Repeat the process for your other hand.
7. Send both photos to Pretty Pures for accurate sizing.
